MariaDB Certification

Validate your expertise, progress your skill set

01 Overview

DBAs who install, configure and maintain databases can prove their proficiency has been vetted and qualified by MariaDB directly. Certification shows you can configure, tune and troubleshoot MariaDB, a badge of expertise for employers invested in MariaDB.

02 Key benefits

Proficiency vetted by MariaDB

Certification gives you a professional edge by signaling that your proficiency has been vetted and qualified by MariaDB directly. It makes you essential to employers invested in MariaDB or contemplating adopting it.

Validate core DBA skills

Candidates must understand relational database concepts and the major components, features, functionality and configuration of MariaDB products. Passing shows you can perform associate-level tasks, from basic configuration to backup and restore.

Real-world, hands-on exam

Exam questions are real-world tasks performed on an exam-specific MariaDB Server, using a preconfigured platform with MariaDB preinstalled and login credentials for an IP address dedicated to the test.

A verifiable digital badge

A digital badge is emailed to successful candidates. Display the secure, verifiable badge on social networks, resumes, email signatures and websites.

03 Key features

CONFIGURE AND SECURE

- Basic configuration
- Security
- User and role assignments

OPERATE AND TUNE

- Schema operations
- Performance tuning
- Backup and restore

EXAM FORMAT

- 120 minutes to complete
- Up to 30 minutes of pre-checks
- In person or remote

EXAM PREPARATION

- MariaDB Standard DBA course
- DBA Associate Exam Prep course
- Enterprise documentation
- Knowledge Base, blog, webinars

TRAINING COURSES

- MariaDB Standard DBA
- MariaDB Standard Developer
- MariaDB MaxScale
- MariaDB Cluster

04 How it works

Prepare by completing the MariaDB Standard DBA training course and the MariaDB DBA Associate Certification Exam Prep course, which covers the subject areas, exam format, computer requirements and proctoring. Take the exam in person or remotely from anywhere in the world. After identity verification and environment checks, you have 120 minutes to complete the tasks. Scripts grade your work as soon as you finish, and successful candidates receive a digital badge by email.

MariaDB certification administration skills

05 Use Case

Take the exam remotely

The remote exam can be taken anywhere in the world. A live proctor from MariaDB's partner, Examity, observes each remote exam. Make sure the computer you will use can download Zoom and GoToMeeting, and download them before your exam. Successful candidates can display a secure and verifiable digital badge on social networks, resumes, email signatures and websites.
